Instructions for connecting to the Baruch College
Wireless Network for Faculty and Staff
Macintosh OS Guide

Baruch College now offers a convenient, secure way for Faculty and Staff to connect their wireless devices to our secure wireless network. This guide will describe how you can connect your Macintosh workstation in a step-by-step manner.

Requirements:

Macintosh with OS X version 10.6 and higher

Step 1: Make sure your wireless is turned on and is showing all available networks. In more recent OS versions this is known as Wi-Fi. In an older OS version, this is known as Airport. If you are in range of a wireless access point while on campus, you will see the access point listed as “Baruch-FacStaff” as a choice.
Step 2: Select “Baruch-FacStaff” from the list of available access points. If this is the first time you are connecting to a network here at Baruch, this is what you will see:

If you have already connected to a network here on campus, you may need to select the access point from the list directly within the wireless menu in the Mac menubar:
Step 3: Once Baruch-FacStaff is selected, you will be presented with a login window.

Please enter your Baruch College Login ID as the username and your password. You MUST include the domain your account belongs to before the username, exactly how you would login to some computers on campus. An example is found below:

Select “Join.”
Step 4: If the information you entered is correct, you will be authenticated and connected.

If you have any problems, please do not hesitate to contact the Baruch College Computing & Technology Help Desk for assistance.
