Instructions for connecting to the Baruch College Wireless Network for Students, Faculty and Staff
Macintosh OS Guide

Baruch College offers a convenient, secure way for Students, Faculty and Staff to connect their wireless devices to our general wireless network. This guide will describe how you can connect your Macintosh workstation to the Baruch-WiFi access point in a step-by-step manner.

Requirements:

Macintosh with OS X version 10.6 and higher

**Step 1:** Make sure your wireless is turned on and is showing all available networks. In more recent OS versions this is known as Wi-Fi. In an older OS version, this is known as Airport. If you are in range of a wireless access point while on campus, you will see the access point listed as “Baruch-Wifi” as a choice.
Step 2: Select “Baruch-WiFi” from the list of available access points. If this is the first time you are connecting to a network here at Baruch, this is what you may see:

If you have already connected to a network here on campus, you may need to select the access point from the list directly within the wireless menu in the Mac menubar:
**Step 3:** Once Baruch-WiFi is selected, you will be presented with a login window.

If the login window does not appear, open any web browser and attempt to navigate to a web page to prompt the login screen.

**Step 4:** Please enter your username and your password. For students, you will use your Baruch Username. Faculty and Staff will use your network/email username and password.

Select “Log In.”
Step 5: If the information you entered is correct, you will be authenticated and connected to the Baruch-WiFi wireless network.

Click “Done.”

You are now connected and you may open a web browser to begin navigating to the web page of your choice.

Please note: If your password is incorrect, you will not be told this when attempting to login on our authentication page. You will be brought back to the login page to try your login information again. Please make sure your username and password is correct when logging into the wireless. This can be done by visiting any of our student computing labs (for students) or using your personal workstation (faculty and staff) and logging in successfully.

If you have any problems, please do not hesitate to contact the Baruch College Computing & Technology Help Desk for assistance.
