Instructions for connecting to the Baruch College Wireless Network for Students, Faculty and Staff
iOS (iPad) Guide

Baruch College offers a convenient, secure way for Students, Faculty and Staff to connect their wireless devices to our general wireless network. This guide will describe how you can connect your iPad to the Baruch-WiFi access point in a step-by-step manner.

Requirements:

Apple iPad with the most recent version of iOS software update installed

Step 1: Go to your iPad settings via the Settings icon. Make sure your wireless is turned on and is showing all available networks. If you are in range of a wireless access point while on campus, you will see the access point listed as “Baruch-WiFi” as a choice.
Step 2: Select “Baruch-WiFi” from the list of available access points. Once selected, you will see a pop-up screen appear with our authentication page:

![Authentication Required for Wireless Access](image)

Step 3: Please enter your username and your password. For students, you will use your Baruch Username. Faculty and Staff will use your network/email username and password.

Select “Login.”

Step 4: If the information you entered is correct, you will be redirected to the Baruch College Home Page, as seen below:
Once you select “Done” you will then be connected to the Baruch-WiFi wireless network.

You are now connected and you may open a web browser to begin navigating to the web page of your choice.

**Please note:** If your password is incorrect, you will not be told this when attempting to login on our authentication page. You will be brought back to the login page to try your login information again. Please make sure your username and password is correct when logging into the wireless. This can be done by visiting any of our student computing labs (for students) or using your personal workstation (faculty and staff) and logging in successfully.

*If you have any problems, please do not hesitate to contact the [Baruch College Computing & Technology Help Desk](#) for assistance.*
