Instructions for connecting to the Baruch College Wireless Network for Students Android Mobile Device Guide

Baruch College now offers a convenient, secure way for Students to connect their wireless devices to our secure wireless network. This guide will describe how you can connect your Android Mobile Device in a step-by-step manner.

Requirements:

Android Mobile Device with the most recent OS software update installed

**Step 1:** Make sure your wireless is turned on and is showing all available networks. Go to your phone settings via the Settings icon. Once there, select “Wi-Fi.”
If you are in range of a wireless access point while on campus, you will see the access point listed as “Baruch-Students” as a choice.

Step 2: Select “Baruch-Students” from the list of available access points. You will be prompted to enter your credentials (scroll down if you do not immediately see this part of the window).

Step 3: Please enter your Baruch Username as the username and your current password. You will login exactly how you would login to some computers on campus. An example is found below:
NOTE: Make sure Anonymous identity is left blank.

Select “Connect.”

**Step 4:** If the information you entered is correct, you will be authenticated and connected.

At this point you will be connected to the Baruch-Students wireless network.

*If you have any problems, please do not hesitate to contact the Baruch College Computing & Technology Help Desk for assistance.*
