Announcing

THE NEW FACULTY DEVELOPMENT PROGRAM

Proposals due April 1, 2005

A PROGRAM TO DEVELOP INNOVATIVE PROJECTS IN TWO CRITICAL AND RELATED AREAS:

TEACHING CUNY’S UNDERGRADUATES

To deliver on the Master Plan’s promise to strengthen undergraduate education across CUNY, the new Faculty Development Program envisions a range of projects focused on teaching CUNY’s undergraduates. Especially welcome are projects that explore the richness of disciplinary knowledge, as well as projects that integrate multiple disciplinary perspectives, pedagogies and methodologies. Proposals are invited from individuals or disciplinary/interdisciplinary teams.

Possible areas to consider:

• Teaching at-risk students
• Teaching with technology
• Teaching first-year students
• Teaching CUNY’s multi-lingual/multi-cultural students
• Liberal education (across the curriculum)
• Global studies/transnationalism
• Capstone courses
• Academic literacies (including writing, reading, speaking, language, media, information technologies, and quantitative and qualitative reasoning) across the curriculum

For more information about applying to this program, contact Crys Benedicks at (212) 794-5514 or Crys.Benedicks@mail.cuny.edu.

FOSTERING A RESEARCH ENVIRONMENT: NEW YORK CITY

As the nation’s largest urban university, it is a central part of CUNY’s missions to focus attention on the needs of its urban setting. We encourage research proposals that take interdisciplinary approaches to study topics that are particularly relevant to New York City. Proposals must be submitted by interdisciplinary teams of two or more.

Possible areas to consider:

• Demographics
• Environmental ethics
• K-12 and post-secondary education
• Housing
• Homeland security
• Urban health
• Transportation

For more information about applying to this program, contact Sherine Tambyraja at (212) 794-5400 or sherine.tambyraja@mail.cuny.edu.

All participants in both areas will come together for a one-day Spring colloquium.

Please submit proposals to only one of the two categories above. Proposals that integrate the two are also welcome; please discuss with one of the two contacts prior to submission of such a proposal.

Applications and more information at www.cuny.edu/research.
