

The SAGE Handbook of  
**Organizational  
Research Methods**

Edited by  
David A. Buchanan  
and Alan Bryman

 **SAGE**

# Handbook of Organizational Research Methods

Edited by **David Buchanan** *Cranfield University*  
and **Alan Bryman** *Leicester University*

The **SAGE Handbook of Organizational Research Methods** provides a rich resource for organizational researchers, locating the technical aspects of organizational research in the wider context of the relevant personal, epistemological, theoretical, historical, ethical, and political issues.

**Buchanan** and **Bryman** have gathered together many of the world's leading writers on theory, method and analysis in organizational research and have made this the most comprehensive and cutting-edge volume in this ever-growing field. The handbook aims to:

- Provide a comprehensive critical review of contemporary issues, debates, field practice, and trends across the domain of organizational research;
- Locate current thinking, debates, and methods in the history of organizational research;
- Identify trends, theories, and issues which have the potential to shape the underpinning epistemologies, theories and methodologies of future organizational research;
- Explore strategies for bridging the gap between researchers and those who are in a position to act on research findings to influence organizational practice

The **SAGE Handbook of Organizational Research Methods** provides an impressively comprehensive critical review of contemporary issues, debates and trends across the domain of organizational research. It will be an indispensable reference work for all organizational researchers.

## Contents

### Acknowledgements

### About the contributors

### Preface

The organizational research context: properties and implications

**David A. Buchanan and Alan Bryman**

### PART 1: DILEMMAS

#### The Shifting Context of Organizational Research

*Focusing on the issues, debates, tensions, and dilemmas which define the historical, epistemological, and practical contexts in which organizational research occurs.*

Organizational research as alternative ways of attending to and talking about structures and activities

**Stanley Deetz**

Interpretivism in organizational research: on elephants and blind researchers

**Dvora Yanow and Sierk Ybema**

Critical methodology in management and organization research

**Mats Alvesson and Karen Lee Ashcraft**

Research ethics: regulations and responsibilities

**Emma Bell and Edward Wray-Bliss**

Rhetoric and evidence: the case of evidence-based management

**Mark Learmonth**

### PART 2: AGENDAS

#### The Broadening Focus of Organizational Research

*Focusing on influential traditions in organizational research, on areas that have helped to define and characterize the field, exemplifying methodological approaches, developments, and trends, taking methodology into new territory.*

Leadership research: traditions, developments, and current directions

**Michael D. Mumford, Tamara L. Friedrich, Jay J. Caughron, and Alison L. Antes**

Endless crossroads: debates, deliberations and disagreements on studying organizational culture

**Pushkala Prasad and Anshuman Prasad**

Doing power work

**Stewart Clegg**

The deinstitutionalization of institutional theory?: exploring divergent agendas in institutional research

**Robert J. David and Alex B. Bitektine**

Methodological issues in researching institutional change

**Roy Suddaby and Royston Greenwood**

Job satisfaction in organizational research

**Alannah E. Rafferty and Mark A. Griffin**

Studying organizational populations over time

**Glenn R. Carroll, Mi Feng, Gaël Le Mens and David G. McKendrick**

‘Do you do beautiful things?’: aesthetics and art in qualitative methods of organization studies

**Antonio Strati**

Feminist perspectives on gender in organizational research: what is and is yet to be

**Marta Calás and Linda Smircich**

Researching work and institutions through ethnographic documentaries

**John S. Hassard**

### PART 3: STRATEGIES

#### Approaches to Organizational Research

*Focusing on approaches to achieving research aims, illustrating links between topic, aims, strategy, analytical framework, and theoretical development, and also demonstrating the range of choice and degree of creativity as well as technical knowledge underpinning research strategies.*

Craving for generality and small-n studies:

a Wittgensteinian approach towards the epistemology of the particular in organization and management studies

**Haridimos Tsoukas**

Implications of research design options for the validity of inferences derived from organizational research

**Eugene F. Stone-Romero**

Cross-cultural comparative studies and issues in international research collaboration

**Mark F. Peterson**

Common method variance or measurement bias?: the problem and possible solutions

**Paul E. Spector and Michael T. Brannick**

Collaborative research: renewing action and governing science

**Jean-Louis Denis and Pascale Lehoux**

Grounded theory perspectives in organizational research  
**Christina Goulding**

Archival research in organizations in a digital age  
**Michael Moss**

Studying processes in and around organizations  
**Ann Langley**

Critical realism: philosophy, method, or philosophy in search of a method ?  
**Michael I. Reed**

#### **PART 4: METHODS**

##### **Data Collection in Organizational Research**

*Focusing on methods of data collection in organizational research, demonstrating the inventiveness and innovation that now characterizes this field, and the widening range of possibilities concerning the development of data collection tools.*

Response rates and sample representativeness: identifying contextual response drivers  
**Timothy R. Hinkin and Brooks C. Holtom**

Comparative case study designs: their utility and development in organizational research  
**Louise Fitzgerald and Sue Dopson**

Conversation analysis in organizational research  
**David Greatbatch**

Interviews in organizational research  
**Catherine Cassell**

Mixed methods in organizational research  
**Alan Bryman**

Research designs for realist research  
**Stephen Ackroyd**

Discourse analysis in organizational research: methods and debates  
**Nelson Phillips and MariaLaura Di Domenico**

Visual methods in organizational research  
**Samantha Warren**

Narrative and stories in organizational research: an exploration of gendered politics in research methodology  
**Carl Rhodes and Alison Pullen**

Ethnography in organizational settings  
**Gary Alan Fine, Calvin Morrill and Sharmi Surianarain**

From *Modern Times* to *Syriana*: feature films as research data  
**John S. Hassard and David A. Buchanan**

Measurement in the organizational sciences: conceptual and technological advances  
**Charles A. Scherbaum and Adam W. Meade**

Making visible the hidden: researching off-the-books work  
**Colin C. Williams and Monder Ram**

Producing a systematic review  
**David Denyer and David Tranfield**

Organizational autoethnography  
**Ken Parry and Maree Boyle**

#### **CONCLUSION**

##### **The Future of Organizational Research**

The present and futures of organizational research  
**Alan Bryman and David A. Buchanan**

# The SAGE Handbook of New Approaches in Management and Organization

Edited by **Daved Barry** *University Nova, Lisbon* and **Hans Hansen** *Texas Tech University*

This new volume will allow readers to stay one step ahead of the latest thinking. Contributors draw on research and practice to introduce ideas that are considered 'fringe' and controversial today, but may be key theoretical contributions tomorrow.

Each chapter sets these ideas in their historical context, lays out the key theoretical positions taken by each new approach and makes it clear why these approaches are different to more mainstream concepts.

Researchers, teachers and advanced students who are interested in the future of Business and Management scholarship will want to read this Handbook.

April 2008 • 632 pages  
Cloth (978-1-4129-1218-1) • £90.00

# The SAGE Handbook of Case-Based Methods

Edited by **David Byrne** *Durham University* and **Charles C Ragin** *Northwestern University*

'This book provides a fresh and stimulating approach to causal analysis in the social sciences. International experts provide not just the philosophical arguments for a case-based approach to research but also detailed chapters on: 'why-to', 'when-to' and 'how-to' - *Professor Angela Dale, The University of Manchester*

Providing a comprehensive, critical examination of case-oriented research, this Handbook offers concrete proposals about the best research methods and provides an unparalleled guide to the emergence and complexity of the field.

April 2009 • 512 pages  
Cloth (978-1-4129-3051-2) • £90.00

# The SAGE Handbook of Organizational Behavior

## Volumes One and Two

Edited by **Julian Barling** *Queens University, Kingston*, **Cary L Cooper** *Lancaster University*, **Stewart R Clegg** *University of Technology, Sydney; University of Aston; Visiting Professor at the Faculty of Business at Maastricht University; the Vrije Universiteit of Amsterdam and EM-Lyon* and **Cary Cooper** *Lancaster University*

This milestone handbook brings together an impressive collection of international contributions on micro and macro research in organizational behaviour. **The SAGE Handbook of Organizational Behavior, Volume One** provides students and scholars with an insightful and wide-reaching survey of the current state of the field and is an indispensable road map to the subject area. The second volume of **The SAGE Handbook of Organizational Behaviour** focuses on macro-organizational behaviour, revealing ways in which the person and group affect the organization.
