Instructions for connecting to the Baruch College Wireless Network for Students
Windows 7 Guide

Baruch College now offers a convenient, secure way for Students to connect their wireless devices to our secure wireless network. This guide will describe how you can connect your Windows 7 workstation in a step-by-step manner.

Requirements:

Microsoft Windows 7

Step 1: Make sure your wireless is turned on and is showing all available networks. If you are in range of a wireless access point while on campus, you will see the access point listed as “Baruch-Students” as a choice.
Step 2: **If you attempt to connect to Baruch-Students this way it will fail.** Further configuration is required. Please read below for more.

You will need to manually enter the information necessary for you to connect. Windows 7 will prompt you for a username and password but there are other items that must be configured for the connection to work. Read further for information on how to do this.
Step 3: Select “Open Network and Sharing Center” located at the bottom of the list available connections.

Select “Manage wireless networks” from the sidebar on the left.
**Step 3:** You will be presented with the following window. Select “Add” to add a wireless network.

**Step 4:** Once presented with the window below, you will want to select “Manually create a network profile.”
Step 5: The window below will appear.

![Image of network settings window]

Please enter the following information:

![Image of filled network settings window]

Hit “Next.”
**Step 6:** On the next window, select “Change Connection settings.”

These are the settings that must be configured. Click on the tab labeled “Security” and make sure the settings there are correct as well. Once verified, select “Settings” located on the right of the window in the Security Tab.
Step 7: Verify your settings are the same as the ones listed below.

Once complete, select “Configure.” Make sure the window you see is listed as it is below:
**Step 8:** Hit Ok twice and return to the window shown below. Select “Advanced settings.”

These are the settings that must be configured in the Advanced Settings window. Make sure the settings for “802.1X settings” are set as indicated below.
Step 9: Once you have verified this information, please select “Save Credentials.” You will be presented with the following window requesting your Baruch College Login Username and Password.

![Windows Security](image)

Please enter your Baruch Username as the username and your current password. You will login exactly how you would login to some computers on campus. The information above is ONLY an example. Select “OK” for any other window left open.

Step 10: If you have followed all of the steps correctly, your device will automatically find, connect and authenticate to the wireless each time you are on campus and in the vicinity of a Baruch-Students wireless access point.
