

MS Programs

Master of Science

Zicklin's MS degree programs offer in-depth study in a range of areas. While the MBA provides a broader business management curriculum, the MS is a more focused degree and usually requires fewer courses (generally between 10 and 16). MS degree programs provide flexibility by permitting students to study full or part time and to switch schedules as their needs require. Please consult the detailed information for each MS program for degree requirements.
