## The Faculty

**Chair: Albert E. Croker**

### Professors:

- Ann Brandwein
- Albert E. Croker
- M. Barry Dumas
- Hammou El Barmi
- Martin Frankel
- Linda W. Friedman
- Shulamith Gross
- Kari Reiner Lang
- Michael Palley
- Abdullah Uz Tansel

### Associate Professors:

- Raquel Benbunan-Fich
- William Ferns
- Elsie S. Gottlieb
- Arie Harel
- Richard Holowczak
- Marios Koufaris
- Nanda Kumar
- Pai-Chun Ma
- Kannan Mohan
- Yitzchak P. Sabban
- Isak Taksa
- Lawrence Tatum

### Assistant Professors:

- Hyokyoung Hong
- Radhika Jain
- Ronald Neath
- Rongning Wu
- Yu Yue

### Lecturer:

- Robert Blau

- Morris Schwartz

## Field Description

The department offers courses in the areas of computer information systems (CIS), operations research, and statistics. Courses in each of these areas provide training in problemsolving techniques useful in gaining strategic advantage in the marketplace. CIS students are afforded the opportunity to gain a strong foundation in the business, managerial, and technical issues related to information systems with courses in programming, data management, telecommunications, the Internet and e-commerce, and the analysis and design of computer-based solutions to business problems. Operations research trains students in the application of mathematical models and decision making for business, industry, and government with an emphasis on modeling methods, analysis, and implementation relevant to operational and management planning issues. Statistics students are provided with a skills base for the application of statistical techniques and tools to a wide variety of areas, including computational statistics, sample survey, experimental design, and quantitative methods in marketing.

## The Majors

- [General Information](#)
- [BBA in Computer Information Systems](#)
- [BBA in Statistics and Quantitative Modeling](#)
- [Statistics: BA Major](#)

## General Information

The Department of Statistics and Computer Information Systems offers majors in the fields of computer information systems and statistics and quantitative modeling.

The **computer information systems** area prepares professionals in the development and use of computer-based technologies to develop systems that fulfill business information needs. Baruch's program trains students to analyze business needs and to design, implement, and use information systems to satisfy those needs.

The **operations research** area provides basic preparation for students who wish to pursue careers in the decision sciences and provides fundamental quantitative knowledge required by those who major in other business areas. Emphasis is placed on modeling methods, analysis, and implementation relevant to operational and management planning issues in many business areas, including marketing, production, finance, accounting, and information technology.

The **statistics** area not only provides the basic preparation for students who wish to pursue careers in statistics but also provides the quantitative knowledge required by those who major in other business areas. Statistics and quantitative modeling majors are provided with the base for the application of statistical techniques to a wide variety of fields.

## BBA in Computer Information Systems

The CIS program provides a strong foundation in the business and managerial issues related to information systems. Computer information systems are presented in light of their role as tools for strategic advantage in the marketplace. To facilitate this, course offerings provide computer, technological, and problem - solving skills. The CIS program addresses such areas as CASE (computer-assisted software engineering), networks and telecommunications, electronic commerce, the Internet, client-server technology, and object-oriented technologies.

| Required Courses         |                               | 12 credits |
|--------------------------|-------------------------------|------------|
| <a href="#">CIS 3100</a> | Object-Oriented Programming I | 3 credits  |
| <a href="#">CIS 3400</a> | Database Management Systems I | 3 credits  |

|                                                                                               |                                                           |             |
|-----------------------------------------------------------------------------------------------|-----------------------------------------------------------|-------------|
| <a href="#">CIS 4800</a>                                                                      | Systems Analysis and Design                               | 3 credits   |
| <a href="#">CIS 5800</a>                                                                      | Information Technology Development and Project Management | 3 credits   |
| <b>Elective Courses</b> <b>12 credits</b><br><i>Any four courses from the following list:</i> |                                                           |             |
| <a href="#">CIS 3367</a>                                                                      | Spreadsheet Applications in Business                      | 3 credits   |
| <a href="#">CIS 3444</a>                                                                      | E-Business Technologies                                   | 3 credits   |

## BBA in Statistics and Quantitative Modeling

The statistics and quantitative modeling major is designed to develop quantitative thinking skills that are invaluable in business. The student will take courses from a variety of quantitative disciplines that focus extensively on statistical methodology, mathematical modeling, and computer implementation issues applied to business. The use of the computer for the solution and analysis of business problems is an integral part of the program. Graduates of this program will have a broad foundation in statistics or quantitative modeling and will be well positioned for the analysis and solution of decision problems facing business and industry in the 21st century.

It is essential that the student consult with an area advisor to plan a program prior to taking any courses in the major.

| Major                                                                                                               |                                                             |           |
|---------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|-----------|
| <b>Required Courses (12 credits)</b>                                                                                |                                                             |           |
| CIS 3100                                                                                                            | Object-Oriented Programming I                               | 3 credits |
| OPR 3450                                                                                                            | Quantitative Decision Making for Business I *               | 3 credits |

### Statistics: BA Major

Arts and sciences students can major in one of the following three programs in the Department of Statistics and Computer Information Systems:

- [Statistical Theory](#)
- [Psychometrics](#)
- [Sociometrics](#)

The department offers courses for students who are primarily interested in mathematics, psychology, and sociology. Statistical theory, using the Colleges extensive computer installations, provides professional training for those who desire a career in operations research, quality control and reliability, health sciences and governmental statistics, design and analysis of surveys, and computer information systems. Joint major programs in conjunction with the Departments of Psychology and Sociology and Anthropology are offered and include courses to augment study in psychometrics and sociometrics.

### Statistical Theory

#### Base Courses

|                          |                                                      |           |
|--------------------------|------------------------------------------------------|-----------|
| <a href="#">CIS 2200</a> | Introduction to Information Systems and Technologies | 3 credits |
| <a href="#">STA 2100</a> | Statistical Methods for Social Science               | 3 credits |
| <a href="#">MTH 2630</a> | Analytic Geometry and Calculus I                     | 5 credits |
| <a href="#">MTH 3030</a> | Analytic Geometry and Calculus II                    | 5 credits |

**Major**

The major consists of 24 credits, with up to 9 credits in mathematics. **Required Courses**

|                          |                                                                              |           |
|--------------------------|------------------------------------------------------------------------------|-----------|
| <a href="#">STA 3551</a> | Theory of Statistics I - Introduction to Probability and Distribution Theory | 3 credits |
| <a href="#">STA 4552</a> | Theory of Statistics II - Statistical Inference                              | 3 credits |

**Elective Courses**

|                          |                                                             |           |
|--------------------------|-------------------------------------------------------------|-----------|
| <a href="#">CIS 3100</a> | Object-Oriented Programming I                               | 3 credits |
| <a href="#">OPR 4652</a> | Introduction to Mathematical Programming                    | 3 credits |
| <a href="#">OPR 4653</a> | Introduction to Statistical Decision Theory and Game Theory | 3 credits |
| <a href="#">OPR 4654</a> | Queueing Theory and Inventory Models                        | 3 credits |
| <a href="#">STA 3156</a> | Sampling Theory and Practice                                | 3 credits |
| <a href="#">STA 3255</a> | Statistical Quality Control Methods                         | 3 credits |
| <a href="#">STA 3560</a> | Nonparametric Statistics                                    | 3 credits |
| <a href="#">STA 4158</a> | Analysis of Time Series                                     | 3 credits |
| <a href="#">STA 4256</a> | Advanced Sampling Methods                                   | 3 credits |
| <a href="#">STA 5559</a> | Introduction to Multivariate Analysis                       | 3 credits |
| <a href="#">MTH 4010</a> | Advanced Calculus I                                         | 3 credits |
| <a href="#">MTH 4020</a> | Advanced Calculus II                                        | 3 credits |
| <a href="#">MTH 4100</a> | Linear Algebra and Matrix Methods                           | 3 credits |
| <a href="#">MTH 4120</a> | Introduction to Probability                                 | 3 credits |
| <a href="#">MTH 4130</a> | Mathematics of Statistics                                   | 3 credits |
| <a href="#">MTH 5010</a> | Advanced Calculus III                                       | 3 credits |

## The Minors

### General Information

The Department of Statistics and Computer Information Systems offers three minor concentrations\*. These are in the fields of computer applications in business, quantitative methods and modeling, and statistics. Each is outlined below.

- [Computer Applications in Business](#)
- [Quantitative Methods and Modeling](#)
- [Statistics](#)
  
- [Liberal Arts Interdisciplinary Minor in Information Technology and Social Responsibility](#)
- [Minors for Non-Business Majors](#)

\* Optional second minors open only to students pursuing a major within the Zicklin School of Business

### Computer Applications in Business

This minor is designed to prepare students majoring in other areas of business to be competent end users and decision makers in a computer information systems environment. The focus is on using microcomputers and higher-level applications software to implement useful applications in a wide range of business areas.

|                                                                                                                                                                                                                                                                                                                                                                                                              |                                             |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|-----------|
| <b>Required Courses</b> <b>9 credits</b>                                                                                                                                                                                                                                                                                                                                                                     |                                             |           |
| Choose any three courses (9 credits) from the list of 3000, 4000, or 5000 level CIS courses except CIS 3270, CIS 3810 and CIS 4910. Prerequisites must be satisfied.                                                                                                                                                                                                                                         |                                             |           |
| <a href="#">Return to Minors</a><br><a href="#">back to top</a>                                                                                                                                                                                                                                                                                                                                              |                                             |           |
| <b>Quantitative Methods and Modeling</b>                                                                                                                                                                                                                                                                                                                                                                     |                                             |           |
| The minor in quantitative methods and modeling is designed to prepare students majoring in other areas of business with a background of quantitative skills that facilitate the decisionmaking process. In addition to one required course, two elective courses are selected with the approval of the area advisor to complement the students major and provide the student with an appropriate background. |                                             |           |
| <b>Required Courses</b> <b>9 credits</b>                                                                                                                                                                                                                                                                                                                                                                     |                                             |           |

### Liberal Arts Interdisciplinary Minor in Information Technology and Social Responsibility

The internet age has fostered an environment of widespread interconnectedness. This hyperconnectivity, and the new media that proliferate along with it, come with their own specific problems. The purpose of this concentration is to study the effects of these new technologies on the individual, the workplace, and society at large. In this program of study students will examine the increasing importance of individual and organizational social responsibility in today's interconnected and computer-mediated environment, as well as the specific issues that stand at the intersection of social responsibility and information technology.

| Students in the Weissman School of Arts and Sciences or in the School of Public Affairs who wish to take business courses may do so by declaring a minor in statistics and quantitative modeling or in technology, business, and the Internet. Before declaring the minor, they must complete either BUS 1001 (1 credit) or have previously completed BUS 1000 (3 credits). To be awarded the minor, students must have a GPA of 2.0 or more in the courses included in the minor. Eligibility to declare such a minor is restricted to students who have an overall GPA of 2.0 or more at time they declare the minor. Courses that apply to the minor may not be used for any other requirement. This minor does not fulfill the requirement to complete a liberal arts minor. |                                                                                  |           |
| Students must choose three courses (9 credits) from the following:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                  |           |
| <b>Statistics and Quantitative Modeling</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                  |           |

#### Courses in Statistics (STA)

|                          |                                    |                    |
|--------------------------|------------------------------------|--------------------|
| <a href="#">STA 2000</a> | Business Statistics I              | 3 hours; 3 credits |
| <a href="#">STA 2100</a> | Statistics for Social Science      | 4 hours; 3 credits |
| <a href="#">STA 3150</a> | Data Analysis and Model Building I | 3 hours; 3 credits |

|                           |                                                             |                    |
|---------------------------|-------------------------------------------------------------|--------------------|
| <a href="#">STA 3154</a>  | Business Statistics II                                      | 3 hours; 3 credits |
| <a href="#">STA 3155</a>  | Regression and Forecasting Models for Business Applications | 3 hours; 3 credits |
| <a href="#">STA 3156</a>  | Sampling Theory and Practice                                | 3 hours; 3 credits |
| <a href="#">STA 3253</a>  | Categorical Data Analysis                                   | 3 hours; 3 credits |
| <a href="#">STA 3255</a>  | Statistical Quality Control Methods                         | 3 hours; 3 credits |
| <a href="#">STA 3560</a>  | Nonparametric Statistics                                    | 3 hours; 3 credits |
| <a href="#">STA 4000</a>  | Introduction to SAS Programming                             | 3 hours; 3 credits |
| <a href="#">STA 4150</a>  | Data Analysis and Model Building II                         | 3 hours; 3 credits |
| <a href="#">STA 4157</a>  | Design and Analysis of Experimental Data                    | 3 hours; 3 credits |
| <a href="#">STA 4158</a>  | Analysis of Time Series                                     | 3 hours; 3 credits |
| <a href="#">STA 4370</a>  | Special Topics in Applied Statistics                        | 3 hours; 3 credits |
| <a href="#">STA 5000</a>  | Independent Study and Research in Statistics                | 3 hours; 3 credits |
| <a href="#">STA 2000H</a> | Hon bus Statistics                                          | 3 hours; 3 credits |
| <a href="#">STA 2200H</a> | Hon Bus Statistics                                          | 3 hours; 3 credits |
| <a href="#">STA 6001H</a> | Hon Statistics I                                            | 3 hours; 3 credits |
| <a href="#">STA 6002H</a> | Hon Statistics II                                           | 3 hours; 3 credits |
