

The Baruch MBA in Health Care Administration

- [For additional program information see the Zicklin School website](#)

The health care industry is experiencing far-reaching changes. With the rapid development of managed care, providers are merging to form large, integrated delivery systems. The systems that thrive will be led by managers prepared to operate under new sets of rules. Providers will be responsible for the health of the population they serve and for controlling the cost of services. Management of these organizations will require special skills on the part of the health care professionals.

The MBA in Health Care Administration Program is dedicated to excellence in health industry management. The program graduates high-quality managers, people with the requisite flexibility to cope with a rapidly changing health care environment and function effectively in a wide range of settings and organizational forms. To achieve its goals, the program takes a generalist approach to its curriculum. Students obtain a firm grounding in all management disciplines and then consider the application of these disciplines to the problems of health care delivery.

The Baruch MBA in Health Care Administration, an accelerated, three-year, part-time program, has fall admission only. The program is cohort in style. Students enter and move through the program together with no course exemptions irrespective of undergraduate and graduate background. Students attend class two nights per week in each of three trimesters, completing six courses (18 credits) per academic year. The program is designed so that the student will complete it in three years. Students will register in health care sections of core courses; readings, applications, and examples in these designated sections will be relevant to the health care setting. This program is only offered on a part-time basis and may not be taken by international students whose visas require full-time status.

The program is a member of the Association of University Programs in Health Administration and is accredited by the Accrediting Commission on Education for Health Services Administration.
