

# City Municipal Wards for India

 Datasets on this page are copyrighted for use by current Baruch students, faculty, and staff for non-profit, educational, and research purposes. Commercial use and redistribution of the data is prohibited. These datasets cannot be distributed publicly over the Internet; current members of Baruch College should use their Baruch email address and contact the [geospatial data librarian](#) to access restricted datasets. **If you are NOT affiliated with Baruch College CUNY you may NOT request access.**

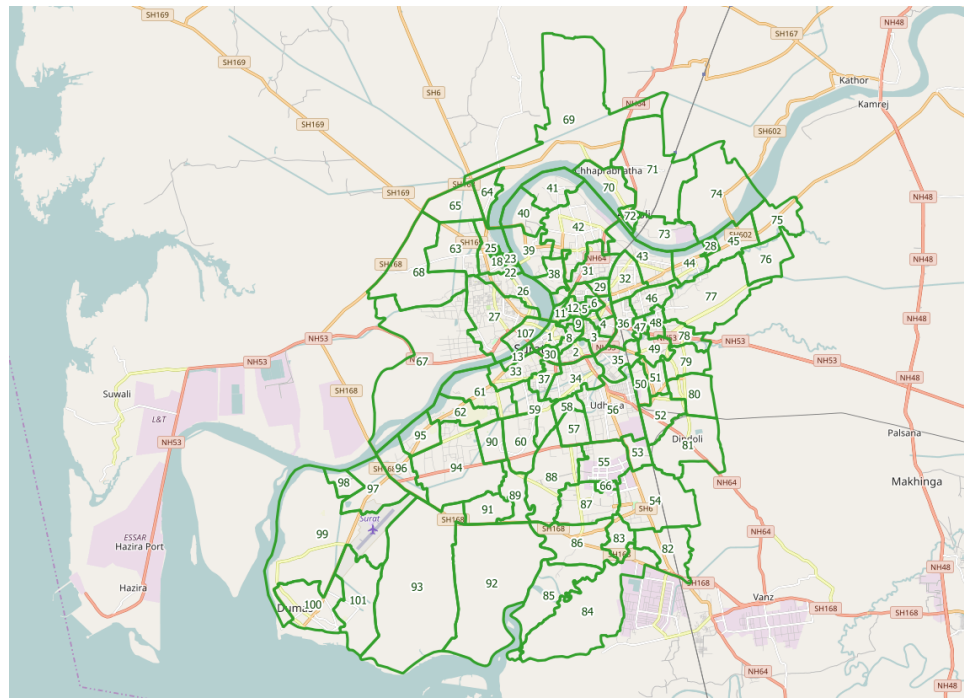

Datasets on this page were created by [ML Infomap](#) and represent city municipal limits and ward boundaries, which are subdivisions of cities. Population attributes from the 2011 Census are included for each ward. The files were produced in Feb 2017 but represent boundaries and data for 2011. All files are projected in WGS 84. If you use this data, you must cite ML Infomap as the source.

Thanks go to to the [CUNY Institute for Demographic Research](#) for obtaining this data for the college.

## City Municipal Wards

[List of variables \(MS Excel\)](#) - Sample is for Surat but attributes are the same for all cities.

Name	Features	File Type	Year	Filename
Ahmedabad	polygon	shapefile	2011	AHMEDABAD.ZIP
