

Financial Risk Management (MS)

Master of Science in Financial Risk Management will provide students with comprehensive, foundational knowledge of modern risk management. Students who complete this degree will be well positioned to accept financial risk management responsibilities and implement effective financial risk management programs in their firms. They will also be able to identify and develop appropriate risk management strategies as new challenges, opportunities, and needs arise in the future.

This degree program is designed so that students have the academic background needed for the professional certification tests of the leading professional financial risk management associations. These are the Financial Risk Manager (FRM) certification of the Global Association of Risk Professionals (GARP) and the Professional Risk Manager (PRM) certification of the Professional Risk Managers International Association (PRMIA). Our program is an academic program that, while it covers the material needed for the FRM and PRM certifications, is not primarily an exam preparatory course.

Preliminary Courses (0-12 Credits)		
Based on their academic background, the admitted applicants may be required to take preliminary courses from the following list. These courses are not part of the 30-credit MSFRM curriculum and the students who take them will incur additional cost.
