## The Faculty

**Chair:** Warren B. Gordon

### University Distinguished Professor:

- Arthur Apter

### Presidential Professor:

- Jim Gatheral

### Professors:

- Warren B. Gordon
- Miriam Hausman
- Bruce Jordan
- Laurence Kirby
- Elena Kosygina
- Andrew Lesniewski
- Anita Mayo
- Carlos Julio Moreno
- Alvany Rocha
- Aaron Todd
- Tai-Ho Wang

### Associate Professors:

- C. Douglas Howard
- Rados Radoicic
- Jakob Reich
- Beryl I. Shaw
- Dan Stefanica
- Sherman Wong
- Ingrid-Mona Zamfirescu

### Assistant Professors:

- Louis-Pierre Arguin
- Michael J. Carlisle
- Feng Chen
- Peter Gregory
- Ivan Matic
- Anja Richter

### Lecturers:

- April Allen-Materowski
- Judith Broadwin
- Evan Fink
- Sarah Harney
- Jarrod Pickens
- Timothy Ridenour

### Field Description

Mathematics has been described as the queen of all sciences. Understanding mathematics enables one to explain and analyze not only science and nature but almost all disciplines from archeology to zoology. Most recently, mathematics has become an indispensable tool in finance and other business related areas. To ensure that mathematics is available for students with varied backgrounds and different professional goals, the department offers courses at all levels. Advanced courses are designed to be taken by mathematics and actuarial science majors and those in related fields.

[back to top](#)

### The Majors

- [Mathematics](#)
- [Actuarial Science](#)
- [Financial Mathematics](#) (*NEW fall 2015*)

### Mathematics

The major in mathematics is designed to enable the student to enter the marketplace (industrial or educational) or to pursue further studies in mathematics or allied fields at the graduate level. Interested students are urged to contact the Department of Mathematics as early as possible. The student will be assigned an advisor who will aid in formulating an appropriate course of study. Students who want to teach mathematics in the secondary schools should consult an advisor in the Center for Advisement and Orientation.

|                                                                                                               |                                         |           |
|---------------------------------------------------------------------------------------------------------------|-----------------------------------------|-----------|
| <b>Required Courses</b><br>All students must take the following three courses:                                |                                         |           |
| <a href="#">MTH 3300</a>                                                                                      | Algorithms, Computers and Programming I | 3 credits |
| <a href="#">MTH 4010</a>                                                                                      | Advanced Calculus I                     | 3 credits |
| <a href="#">MTH 4100</a>                                                                                      | Linear Algebra and Matrix Methods       | 3 credits |
| Students may fulfill their calculus requirements by any one of the following three alternate calculus tracks: |                                         |           |
| <b>Track I:</b>                                                                                               |                                         |           |
| <a href="#">MTH 2610</a>                                                                                      | Calculus I                              | 4 credits |
| <a href="#">MTH 3010</a>                                                                                      | Calculus II                             | 4 credits |
| <a href="#">MTH 3020</a>                                                                                      | Intermediate Calculus                   | 4 credits |
|                                                                                                               | <i>or</i>                               |           |

|                                                                     |                                                         |           |
|---------------------------------------------------------------------|---------------------------------------------------------|-----------|
| MTH 3050                                                            | Multi-Variable and Vector Calculus                      | 4 credits |
| <i>or</i><br><b>Track II:</b>                                       |                                                         |           |
| MTH 2630                                                            | Analytic Geometry and Calculus I                        | 5 credits |
| MTH 3030                                                            | Analytic Geometry and Calculus II                       | 5 credits |
| <i>or</i><br><b>Track III:</b>                                      |                                                         |           |
| MTH 2205                                                            | Applied Calculus II                                     | 3 credits |
|                                                                     | <i>or</i>                                               |           |
| MTH 2207                                                            | Applied Calculus and Matrix Applications                | 4 credits |
| MTH 3006                                                            | Integral Calculus                                       | 4 credits |
| MTH 3030                                                            | Analytic Geometry and Calculus II                       | 5 credits |
| <b>Electives</b>                                                    |                                                         |           |
| Any four 4000-level or 5000-level courses from the following group: |                                                         |           |
| MTH 4030                                                            | Topology                                                | 3 credits |
| MTH 4020                                                            | Advanced Calculus II                                    | 3 credits |
| MTH 4110                                                            | Ordinary Differential Equations                         | 3 credits |
| MTH 4120                                                            | Introduction to Probability                             | 4 credits |
| MTH 4115                                                            | Numerical Methods for Differential Equations in Finance | 4 credits |
| MTH 4125                                                            | Introduction to Stochastic Process                      | 4 credits |
| MTH 4130                                                            | Mathematics of Statistics                               | 4 credits |
| MTH 4135                                                            | Computational Methods in Probability                    | 3 credits |
| MTH 4140                                                            | Graph Theory                                            | 3 credits |
| MTH 4145                                                            | Mathematical Modeling *                                 | 3 credits |
| MTH 4150                                                            | Combinatorics                                           | 3 credits |
| MTH 4200                                                            | Theory of Numbers                                       | 3 credits |
| MTH 4210                                                            | Elements of Modern Algebra                              | 3 credits |
| MTH 4230                                                            | History of Mathematics                                  | 3 credits |
| MTH 4240                                                            | Differential Geometry *                                 | 3 credits |

## Actuarial Science

The field of actuarial science applies mathematical principles and techniques to problems in the insurance industry. Progress in the field is generally based upon completion of examinations given by the Society of Actuaries. The Baruch College major is designed to prepare students to pass the first two exams of the Society of Actuaries year 2000 exam structure and to provide partial preparation for the third exam. Students interested in this highly structured program are urged to contact the Department of Mathematics as early as possible so that the department may assign an advisor to aid in formulating an appropriate course of study.

| Prerequisites                                                                                                                                                                    |                                                         |           |

### Financial Mathematics

This major is first and foremost a course of study in mathematics, with a focus on the computational tools and techniques needed to thrive in the financial engineering industry. In today's specialized world, a sophisticated level of mathematical understanding is an essential competitive edge. As this program includes courses in Economics and Finance, students who would usually not consider a traditional mathematics major will find this program especially attractive. Interested students are urged to contact the Department of Mathematics as early as possible. The student will be assigned an advisor who will aid in formulating an appropriate course of study.

|                                                                                                                                                  |                                                                              |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|-----------|
| <b>Program Prerequisites:</b>                                                                                                                    |                                                                              |           |
| As a preliminary requirement, students must complete two semesters of calculus, which may be achieved by any one of the following three methods: |                                                                              |           |
| <b>Option 1:</b>                                                                                                                                 | <a href="#">MTH 2610</a> Calculus I *                                        | 4 credits |
|                                                                                                                                                  | <i>and</i>                                                                   |           |
|                                                                                                                                                  | <a href="#">MTH 3010</a> Calculus II *                                       | 4 credits |
|                                                                                                                                                  | * A combined GPA of 3.5 or higher in Calculus I and Calculus II is required. |           |
|                                                                                                                                                  |                                                                              |           |
| <b>Option 2:</b>                                                                                                                                 | Calculus AP exam (BC) with a score of 4 or 5                                 |           |
|                                                                                                                                                  |                                                                              |           |

**The Minor - fall 2015 (See below for changes to the Minor that will take place in spring 2016.)**

The minor in mathematics provides students with a background in the various theories and uses of mathematics. The minor requires the completion of MTH 3006 or 3010 and any other 3- or 4-credit mathematics course numbered 3000 or higher. Students must then complete a capstone course consisting of any mathematics course at the 4000 level or higher.

**The Minor (effective spring 2016)**

The minor in mathematics provides students with a background in the various theories and uses of mathematics. The minor requires the completion of MTH 3006 or 3010 and any other 3- or 4-credit mathematics course numbered 3000 or higher. Students must then complete a capstone course consisting of any mathematics course at the 4000-level or higher with the exception of MTH 4410 (which may not be used as a capstone course).

## Courses

### Courses in Mathematics (MTH)

|                          |                                              |                    |
|--------------------------|----------------------------------------------|--------------------|
| <a href="#">MTH 1030</a> | College Algebra                              | 4 hours; 2 credits |
| <a href="#">MTH 2003</a> | Pre-calculus and Elements of Calculus        | 4 hours; 3 credits |
| <a href="#">MTH 2120</a> | Mathematics Appreciation                     | 3 hours; 3 credits |
| <a href="#">MTH 2140</a> | Mathematics and Quantitative Reasoning       | 4 hours; 3 credits |
| <a href="#">MTH 2160</a> | Ideas in Mathematics and Their Applications  | 4 hours; 3 credits |
| <a href="#">MTH 2205</a> | Applied Calculus II                          | 4 hours; 3 credits |
| <a href="#">MTH 2206</a> | Applied Calculus                             | 3 hours; 3 credits |
| <a href="#">MTH 2207</a> | Applied Calculus and Matrix Applications     | 4 hours; 4 credits |
| <a href="#">MTH 2301</a> | Concepts of Discrete Mathematics             | 3 hours; 3 credits |
| <a href="#">MTH 2610</a> | Calculus I                                   | 4 hours; 4 credits |
| <a href="#">MTH 2630</a> | Analytic Geometry and Calculus I             | 5 hours; 5 credits |
| <a href="#">MTH 3006</a> | Integral Calculus                            | 4 hours; 4 credits |
| <a href="#">MTH 3010</a> | Elementary Calculus II                       | 4 hours; 4 credits |
| <a href="#">MTH 3020</a> | Intermediate Calculus                        | 4 hours; 4 credits |
| <a href="#">MTH 3030</a> | Analytic Geometry and Calculus II            | 5 hours; 5 credits |
| <a href="#">MTH 3040</a> | Actuarial Science Theory and Problem Seminar | 2 hours; 2 credits |
| <a href="#">MTH 3050</a> | Multi-Variable and Vector Calculus           | 4 hours; 4 credits |
| <a href="#">MTH 3100</a> | Selected Topics in Discrete Mathematics      | 3 hours; 3 credits |
| <a href="#">MTH 3120</a> | Elementary Probability                       | 3 hours; 3 credits |
| <a href="#">MTH 3300</a> | "Algorithms, Computers, and Programming I"   | 4 hours; 3 credits |
| <a href="#">MTH 3901</a> | Actuarial Science Internship                 | 1 hour; 1 credit   |
| <a href="#">MTH 3902</a> | Actuarial Science Internship                 | 1 hour; 1 credit   |
| <a href="#">MTH 3903</a> | Actuarial Science Internship                 | 1 hour; 1 credit   |

|                          |                                                         |                    |
|--------------------------|---------------------------------------------------------|--------------------|
| <a href="#">MTH 3904</a> | Actuarial Science Internship                            | 1 hour; 1 credit   |
| <a href="#">MTH 3905</a> | Math Internship                                         | 1 hour; 1 credit   |
| <a href="#">MTH 3906</a> | Math Internship                                         | 1 hour; 1 credit   |
| <a href="#">MTH 3907</a> | Math Internship                                         | 1 hour; 1 credit   |
| <a href="#">MTH 3908</a> | Math Internship                                         | 1 hour; 1 credit   |
| <a href="#">MTH 4000</a> | Bridge to Higher Mathematics                            | 4 hours; 3 credits |
| <a href="#">MTH 4005</a> | Problem-Solving Seminar                                 | 3 hours; 3 credits |
| <a href="#">MTH 4010</a> | Advanced Calculus I                                     | 3 hours; 3 credits |
| <a href="#">MTH 4020</a> | Advanced Calculus II                                    | 3 hours; 3 credits |
| <a href="#">MTH 4030</a> | Topology                                                | 3 hours; 3 credits |
| <a href="#">MTH 4100</a> | Linear Algebra and Matrix Methods                       | 3 hours; 3 credits |
