

# Data Updates for Dec 2019

I have a few data updates to announce before this semester comes to an end. We've updated the bus stop and route layers for the [NYC Mass Transit Spatial Layers](#) for December 2019. We decided not to issue updates to the rail and subway files as there were no changes to the underlying data from the static transit feeds. We've also generated an updated list of non-profits in NYC as part of the [IRS Tax Exempt Organizations](#) series. The plan for next month is to release an update for the NYC Geodatabase.

The GIS Lab will be closed Dec 23rd through Jan 6th. We'll re-open on Jan 7th for the winter session; see the [GIS Lab](#) page for details.
